

2025 HEALTHY KIDS COLORADO SURVEY MIDDLE SCHOOL REPORT

Background

The Healthy Kids Colorado Survey (HKCS) collects anonymous health information from middle and high school students throughout the state and is used to better understand youth health and the factors that help young people make healthy choices. This report includes weighted state results from the 2025 HKCS and represents Colorado middle school students. The HKCS is administered by the Colorado School of Public Health (CSPH) with support from the Colorado Departments of Public Health & Environment, Education, Public Safety, the Behavioral Health Administration, and the Attorney General's Office.

Questionnaire and Survey Administration

The HKCS measures adolescent health topics including unintentional injuries and violence; mental health; school safety; substance use; physical activity and nutrition; sexual behavior (optional); and risk and protective factors. Many questions are drawn from national youth health surveys. Other questions have been added with community input to meet additional data needs in Colorado. The standard version of the middle school survey has 72 questions.

The survey is administered online in English and Spanish and takes about 30 minutes to complete. Teachers provide instructions to students emphasizing the anonymous and voluntary nature of the survey. Each school district follows local procedures for parent/guardian consent, including advance notice of the survey administration. Parents may choose not to allow their child to participate and students may also decline participation. The HKCS is provided at no cost to public secondary schools in Colorado. Some of the schools that participate are included in a random sample selected to represent the state. Within some schools, a sample of classrooms is selected to participate. In most schools, all students are surveyed.

Key Definitions

Response Rate: Response rate, shown at the top of the Demographics table, is the product of the school response rate and student response rate among sampled schools. The higher the response rate, the more confidence that the results represent the entire student population in the state. For response rates less than 60%, results should be interpreted with caution as they are likely less representative.

Confidentiality: Responses are suppressed if they might allow students to be identified. A period (.) appears when results are suppressed, specifically when the number of students responding 'yes' to a question is fewer than 3, the number of students responding to the question overall is less than 30, or results represent 0% or 100% of students.

Significance: When comparing results, for example between different demographic groups, examine the 95% confidence intervals. If the intervals overlap, there is no evidence to believe the compared results are different from each other. If they do not overlap, there is high confidence that the results are different (i.e., the difference is statistically significant). Judgement is needed to decide whether the size of the difference is meaningful and important.

Demographic Terms:

- "Youth of color" is an aggregate of the students who chose the following responses to the race/ethnicity demographic question: "American Indian/Alaska Native", "Asian", "Black/African American", "Hispanic/Latino", "Middle Eastern/North African", "Native Hawaiian/Pacific Islander", and "Multiracial" (students selected two or more identities).

- Students included in "Multiracial" selected two or more racial and ethnic identities and represent numerous unique combinations.
- Students included in "Another identity" selected this response on the survey and had the option to write in their answer.
- LGBTQ+ is an aggregate of the students who chose one or more of the following responses: Gender: "Nonbinary", "Another Identity", or "Not Sure"; Sexual Orientation: "Gay/Lesbian", "Bisexual", "Pansexual", "Asexual", "Another Identity", or "Not Sure"; Gender Identity: "Transgender" or "Not Sure".
- Straight/Cisgender is an aggregate of the students who chose all of the following responses: Gender: "Girl/Woman" or "Boy/Man"; Sexual Orientation: "Straight"; Gender Identity: "Cisgender".
